## **DUNDEE R&D FACILITY COMPLETES RENOVATIONS**

DUNDEE, MICHIGAN (November 26, 2008) – ProVisions, LLC announced Wednesday that the Dundee Business Center, a property in which the company invested over \$2 million throughout the year 2008, has been fully renovated and is immediately available as of December 1. This newly renovated facility is for Lease or Sale, and it has 47,373 square feet that can be used for warehouse and/or light manufacturing, and research and development.

Located at 100 Research Parkway in Dundee, Michigan, the Dundee Business Center is adjacent to Cabela's, the nation's largest outdoor outfitter – and about one mile from the Global Engine Manufacturing Alliance LLC (GEMA), a joint venture of Chrysler, Mitsubishi Motors, and Hyundai. It enjoys strategic proximity to other major employers in the area, including Ford Motor Company, Visteon Automotive Systems, Monroe Auto Equipment, Guardian Industries Corp., La-Z-Boy Incorporated and North Star Steel. US-23 facilitates convenient access from Dundee to Ann Arbor, which is 25 miles away; one of the largest research institutions in the United States, the University of Michigan; and the Detroit-Wayne County International Airport.

“Located across the street from Michigan's premier tourist attraction, Cabela's, this is a great location for businesses and quality of life for their employees,” said ProVisions President and CEO Murray D. Wikol.

**PROVISIONS, LLC**, headquartered in Bingham Farms, Michigan, is a leading real estate, economic development and advisory firm serving public and private sectors throughout the United States and abroad.
